

NOTICE TO PROCEED SBA WEBSITE

BEGIN YOUR PROJECTS WITH CONFIDENCE

When you utilize the Notice to Proceed (NTP) SBA website, you can begin your projects with confidence that all details have been confirmed and everyone is onboard to move forward. The NTP website can help your organization avoid costly misunderstandings as to the approved start date of your work on the SBA Communications sites.

THE NTP WEBSITE GET A CLEAR SIGNAL TO BEGIN

As a customer you want to be certain that you and your contractors are approved to start your project with SBA Communications. In the fast-paced world of wireless, the Notice to Proceed website provides you with that certainty. Formal notification to begin or resume project work is automatically delivered to you from the NTP website, helping your organization avoid any confusion that can result from last minute project changes. When you are working on multiple projects across multiple geographies, the Notice to Proceed website assists your organization by:

- Reducing confusion for the carrier representative
- Improving turn-around times
- Minimizing the number of “back and forth” emails
- Providing certainty on the NTP date reservation and approval

TRACK ALL THE DETAILS OF YOUR NTP APPLICATION IN REAL TIME

The Notice to Proceed website enables you to start a new NTP application and track its status: Draft, Submitted, On-Hold, Approved, Rejected, Pending Closeouts, Closed or Cancelled – all in real time. NTP provides an intuitive and quick user interface that allows you to:

- Add supporting documentation
- Assign a contractor
- List subcontractors
- Add any needed additional information

As an added feature, you can export your data to a spreadsheet, and you can use the Quick Jump feature to go directly to a request.

STREAMLINE THE APPROVAL PROCESS

The NTP Approval Section enables you to follow the status of an Approval either by the Safety team or the Regional Site Managers at SBA, who are automatically informed by the NTP system that your request is awaiting approval. The NTP website streamlines the process, keeping everyone on the same page. Greater visibility to the status on your NTP application benefits all project team members. You will be able to:

- Notify pertinent groups
- Distribute an NTP PDF document by email
- Guarantee safety compliance
- Enable SBA to sign up lower tier contractors before delays are created

With more than 25 years of proven execution and experience, SBA Communications is committed to providing you with secure and innovative ways to meet wireless infrastructure project requirements. The Notice to Proceed website offers a convenient and quick way to submit NTP requests, real time tracking and a streamlined approval process, so you can get your projects up and running in a timely fashion with confidence.
